INDEPENDENT SCHOOL DISTRICT

What is Early College High School?

J. B. Alexander High School Early College Academy (AHSECA) is a small school designed for students to earn both a high school diploma and an associate's degree or up to 60 hours of credit toward a bachelor's degree.

AHSECA has the potential to improve high school graduation rates and better prepare all students for high-skilled careers by engaging them in rigorous, college preparatory curriculum and compressing the number of years towards a college degree.

Why Early College High School?

Did you know that...

For every 10 students that start high school:

- 8 will finish and obtain a high school diploma
- 6 will enroll in a post secondary institution
- Only 3 will complete a bachelor's degree within 10 years

A post secondary education is essential for financial and personal freedom in today's economy. A four-year college graduate earns two-thirds more than a high school graduate does. An associate's degree translates into significantly more earnings than with a high school diploma alone.

At J. B. Alexander High School Early College Academy, you are on the path to success!

The United Independent School District has partnered with Laredo College to offer students the opportunity to earn both a high school diploma and up to 60 hours of transferable college credits or an associate's degree.

Students at J. B. Alexander High School Early College Academy begin taking college courses as 9th graders and follow the program throughout the four years. Students will graduate from high school in four years and can complete up to 60 hours of transferable college credit.

What is the difference between J. B. Alexander High School Early College Academy & dual enrollment or Advanced Placement?

What sets Early College High School apart from dual enrollment, Advanced Placement, and other pre-college programs is the rich and coherent academic program and a relentless focus on underrepresented students. J. B. Alexander High School Early College Academy, Advanced Placement, and dual enrollment programs give students an understanding of post secondary education, yielding multiple benefits to students. However, only J. B. Alexander High School Early College Academy:

- Fully integrates students' high school and college experiences, both intellectually and socially;
- Enables students to earn up to two years of college credit towards a degree while in high school;
- Blends the curriculum as a coherent unit, with high school and college-level work into a single academic program that meets the requirements for both a high school diploma and an associate's degree or certificate;]
- Grants college credits through the postsecondary partner institution

and enables students to accumulate the credits toward a degree from that institution or to a university.

Why is it important for students to earn two years of college credit while in high school?

AHSECA prepares high school students for successful career and educational futures through integration of high school and college courses in preparation for the work force. Students will develop the knowledge and skills necessary to become critical thinkers, problem solvers, and successful members of our community.

AHSECA graduates will have a significant advancement on their paths towards their baccalaureate degree. It also provides students access to support structures (academic, emotional, and social) that will enable students to navigate the educational process in higher education. (LC MOU)

What can students do after they complete J. B. Alexander High School Early College Academy?

When students complete AHSECA, they have a high school diploma and up to 60 hours of college credit or an associate's degree. This serves as evidence that ECHS students are significantly more likely to graduate from high school, more likely to enroll in college and more likely to earn a degree. (Hurst & Uribe)

How much money can students save by going to J. B. Alexander High School Early College Academy?
